Summary

Fullstack developer with strong front-end expertise and growing back-end skills. Responsible, adaptable, and a great team fit, with proven strengths in time management and task prioritization.

Project experience

Car rental service | **Source** (React, Redux Toolkit, TypeScript, CSS Modules)
A car rental platform featuring comprehensive filtering system by brand, price range, and mileage. Implements favorites functionality with localStorage persistence, and smart filters that maintain state during navigation.

Role: developer, individual project

Pregnancy Tracker | **Source** (Next.js, React, TypeScript, CSS)
Featuring daily tasks, health diary, baby development tracking, AI assistant, and personalized recommendations. Includes authentication, profile management, and week-by-week pregnancy information.

Role: Team Lead, developer, team project

Trello-like Application | **Source** (React, Redux, TypeScript, SCSS)
Features include creating and managing boards, adding and organizing tasks, responsive design, user authentication, custom board backgrounds, and drag & drop functionality for cards and lists.

Role: developer, individual project

Portfolio | **Source** (Vue, Nuxt, TS, TailwindCSS)
A sophisticated, fully-responsive portfolio showcasing modern web development skills. Includes automated PDF resume generation and is deployed on GitHub Pages with CI/CD pipeline.

Role: developer, individual project

DIM.RIA.com | (Vue, Webpack, JavaScript, HTML, SASS)
Development and maintenance of functionality for the DOM.RIA website - a leading real estate portal in Ukraine. Utilized Vue.js and Webpack to create interactive components and ensure high website performance.

Role: developer, team project
